

About Jiggly Finance

Jiggly Finance is a decentralized yield farm exchange currently running on Binance Smart Chain

Yield Farms are currently generating a lot of interest on BSC. But Jiggly Finance was created with the intention of bringing credibility into a space plagued by Rugpulls such as HoneySwap.fi and Meerkat Finance.

Jiggly Finance hopes to create a clean, credible and sustainable environment for users to feel safe while maintaining a yield farm with high APR.

Currently, project has already been audited by Solidity and Migrator Code has been removed.

Yield Farming: General Trend

Decentralized finance (DeFi) has become a hot topic. Yield farming is undoubtedly one of the most trending sub-topics in the DeFi space and it's not hard to see why. With Smart contracts that makes it easy for users to interact with multiple Blockchain and DeFi protocols as well as gain profits for the assets that they possess. This enables yield farmers to multiply their crypto assets with ease.

Calculations of the returns are commonly subject to Annual Percentage Yield (APY), which indicates the rate of compounding effect. Yield farming involves the usage of multiple defi protocols and more often than not runs the risk Impermanent losses and an inflationary native token.

Jiggly Finance believes that we have only scratched the surface of Yield Farming's true potential as many projects are still hampered by Credibility Issues, Rug Pulls, Volatility and even network congestion. As many things in nature, a balance needs to be found for sustainable and profitable returns, that's when the real breakout in price growth and public adoption will begin.

Jiggly Finance's Deflationary Token: JIGGS

To counteract the inflationary nature of Yield Farming, Jiggly Finance is trying to create a sustainable and deflationary burning mechanism, starting with:

- Jiggly taking a 4% deposit fee when users stake
- 3% will be used to buy back and burn JIGG
- 1% will be used for development, marketing, partnership

Jiggly is currently looking to further improve the burning mechanism in addition to the routine burning carried out with the community.

JIGGS: Tokenomics

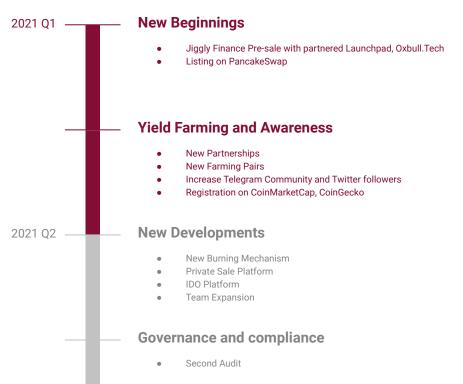

Contract address: 0x82d49d4c442219fdda7857fc1102e7ce6e6e5612

Supply: Unlimited

- 14,400 JIGGs Went on to Pre-sale
- Hard cap: 350 BNB
- Token price: 1 BNB = 41.1428 JIGG
- 8640 JIGG for Pancake Listing
- 210 BNB will be added for liquidity

Jiggly Finance Roadmap

Who We Are

Jiggly Finance currently comprises of 4 like-minded individuals with the aim of building the simplest Yield Farming platform that is safe and profitable whilst keeping the community happy. The team is:

oxHisoka: Eats, breathes, and sleeps decentralization and cryptography. For 4 years in crypto, he has worked with many top tier crypto projects for marketing and business development.

oxGaryOak: Full stack developers who built hundreds of applications, contracts and AI. He has been an active cryptocurrency investor and an evangelist for decentralized systems since early 2018.

oxBrock: He has participated in the first wave of cryptocurrency investing in 2017. 10+ years in customer service, sales & marketing and project management. Co-founder of tech start-ups.

oxMeowth: Ph.D in Computer Science. UI/UX designer. Expert in visualization and product design. He worked at multiple startups and Fortune 500 companies.

At Jiggly Finance, These are just our first steps. we look forward to more announcements and developments in the coming weeks.
